Dr. Anuradha Jayakody.

Malabe, SLIIT.

Dear Sir,

I am currently a student who follows Curtin degree pathway at SLIIT. Currently, I am studying Software engineering at 3rd year of Curtin university pathway. I am interested in Capstone computing project due to the experience I can take in the industry as well as a new adventure to my life. I am glad to work in this project by my knowledge and my abilities and it also give me an additional experience to my career life as well.

As I am an undergraduate student of SLIIT, I have already completed my Higher national diploma in Information technology and as well as have I have skills in programming languages such as C,C++,C#, Java, PHP, Dart, HTML, Python and CSS. I also have experience in using frameworks such as Android, Flutter, Bootstrap, Joomla and I also worked in databases such as SQL server, MySQL, Firebase in my previous projects. In addition I have Government Zonal computer Certification in programming and also have azure cloud computing Knowledge and Google Cloud computing systems.

In addition I have a good English communication skills with leadership skills that are benefited in engage in a project. I can work in tough deadlines and high pressure with other members in order to do work in positive way. I can take the leadership in necessary moment whatever in tight situation gives our group an additional advantage for the project.

Due to these skills and qualifications I am Glad to work in your project in a good manner and I think I am suitable for the Capstone Computing Project due to the above skills and my qualifications. The below mention details are my contact details.
